Medicine, Science and Literature: Reading for the Summer Months

Summer 2016

Compiled and Curated by Kate E. Bright

A Special Thank You to Nancy Bianchi and Elinor Avery for their Assistance in Consultation and Research
Literature. It has the power to provoke, challenge, divert, stimulate, and motivate.

Once again, Dana Medical Library is pleased to offer its popular “Medicine and Science in Literature” exhibit along with a complimentary collection of best sellers and light summer fiction ... all with a medical or science thread.

Literature and Medicine can go hand in hand to gather inspiration from each other and nurture a greater understanding through experience and a broader perspective.
The books highlighted in this exhibit look at science and medicine beyond the clinical and investigative setting. They represent current and bestselling works that serve to emphasize life experiences, powerful moments, and physical & psychological transformations. Discover how literature, even light summer reading, brings out the humanistic aspects of science and medicine!

As a brief summer respite from the busyness of life, we strongly encourage you to take a break and immerse yourself in one of these powerful works of literature. Enjoy!
Gratitude is a collection of essays from Oliver Sacks’ last 2 years of life.

“Oliver Sacks was like no other clinician, or writer. He was drawn to the homes of the sick, the institutions of the most frail and disabled, the company of the unusual and the ‘abnormal.’ He wanted to see humanity in its many variants and to do so in his own, almost anachronistic way—face to face, over time, away from our burgeoning apparatus of computers and algorithms. And, through his writing, he showed us what he saw.”
—Atul Gawande, author of Being Mortal

Vigil: The Poetry of Presence
By Pamela Heinrich MacPherson

Through poetry, Pamela Heinrich MacPherson reveals the dedication needed to be present for those at the very end of life.

“In her encounters with the great variety of people and situations she met through her hospice work, Pam developed a deep trust in the transformative power of bearing witness to human suffering. Her heartfelt poetry is woven from the threads of kindness, acceptance, and the ability to be fully present for others.”

Alive, Alive Oh!

Diana Athill writes this book “on the eve of her ninety-eighth birthday” drawing our attention to a perspective that looks back on life, rather than through the lens of forward-thinking youth. She gives us a glimpse of what truly is important as one nears a century in age.

“As her vivid, textured memories range across the decades, she relates with unflinching candor her harrowing experience as an expectant mother in her forties and crafts unforgettable portraits of friends, writers, and lovers.”

Ordinarily Well, by Peter D. Kramer

Kramer homes in on the moment of clinical decision making: Prescribe or not? What evidence should doctors bring to bear? Using the wide range of reference that readers have come to expect in his books, he traces and critiques the growth of skepticism toward antidepressants. He examines industry-sponsored research, highlighting its shortcomings. He unpacks the “inside baseball” of psychiatry—statistics—and shows how findings can be skewed toward desired conclusions. -Amazon
NEW YORK TIMES BESTSELLER

Chasing The Scream, by Johann Hari

It is now one hundred years since drugs were first banned in the United States. On the eve of this centenary, journalist Johann Hari set off on an epic three-year, thirty-thousand-mile journey into the war on drugs. What he found is that more and more people all over the world have begun to recognize three startling truths: Drugs are not what we think they are. Addiction is not what we think it is. And the drug war has very different motives to the ones we have seen on our TV screens for so long.

The Gilded Razor, by Sam Lansky

Lansky scrapes away at his own life as a young addict and exposes profoundly universal anxieties. Told with remarkable sensitivity, biting humor, and unrelenting self-awareness, The Gilded Razor is a coming-of-age story of searing honesty and lyricism and “one of the best portraits about the implacable power of addiction” - Susan Cheever, bestselling author of Drinking in America
American Pain: How a Young Felon and His Ring of Doctors Unleashed America’s Deadliest Drug Epidemic, by John Temple

*American Pain* reveals an ugly and painful view of America’s drug-addiction epidemic. It’s a story of a multimillion dollar, drug Pushing empire, started at the South Florida Pain Clinic, by the George twins. They hired doctors to prescribe as many opium-based pain pills as they wanted, especially to “patients” from rural Appalachia. Although the George brothers and their accomplices ended up in prison, the problem of addiction to prescription painkillers remains alarmingly acute in many neighborhoods across America.

Dreamland: The True Tale of America’s Opiate Epidemic, by Sam Quinones

*Dreamland: The True Tale of America’s Opiate Epidemic* is a startling account of the opiate epidemic facing America today. With more than 500,000 Americans a year now using heroin and with many of those users’ addictions beginning with pain pills like OxyContin, the tale behind Dreamland reaches across similar small rural towns and big city suburbs. The epidemic was quietly fueled by pharmaceutical companies and doctors who treated pain pills as wonder drugs and by enterprising Mexican drug traffickers who supplied heroin on demand to desperate opiate addicts.
Life Unfolding: How the Human Body Creates itself, by Jamie A. Davies

*Life Unfolding* tells the story of human development from egg to adult, from this perspective, showing how our whole understanding of how we come to be has been transformed in recent years. Highlighting how embryological knowledge is being used to understand why bodies age and fail, Jamie A. Davies explores the profound and fascinating impacts of our newfound knowledge. - Amazon
Consciousness and the Brain: Deciphering How the Brain Codes Our Thoughts, by Stanislas Dehaene
In this lively book, Stanislas Dehaene describes the pioneering work his lab and the labs of other cognitive neuroscientists worldwide have accomplished in defining, testing, and explaining the brain events behind a conscious state. A joyous exploration of the mind and its thrilling complexities, *Consciousness and the Brain* will excite anyone interested in cutting-edge science and technology and the vast philosophical, personal, and ethical implications of finally quantifying consciousness. - Amazon

Cure: A Journey into the Science of Mind over Body, by Jo Marchant
*Cure: A Journey into the Science of Mind over Body* maps out the latest mind-body research around the world. Its author, Jo Marchant, skillfully describes historic and contemporary research findings behind the health benefits of friendship and social connections, meditation and mindfulness, the placebo effect, and even the power of faith. In a world where medical professionals are often rushed, harried, and swamped, *Cure* asks us to consider substitutes for conventional Western medicine therapies. Caring and tenderness cost nothing and may be just the cure for an ailing world.
The Gene: An Intimate History, by Siddhartha Mukherjee

THE #1 NEW YORK TIMES BESTSELLER

From the Pulitzer Prize-winning, bestselling author of The Emperor of All Maladies—a magnificent history of the gene and a response to the defining question of the future: What becomes of being human when we learn to “read” and “write” our own genetic information? – Amazon

21,000 to 23,000 genes make up a human being. Just one governs sex identity. It is also a message with instructions for proteins which are the building blocks of human life. Once again, Siddhartha Mukherjee, navigates a sea of complicated scientific information, this time about the human gene. His style is engaging, understandable, personal, and even humorous at times. A history book that should be read by all.

In the Magic Shop, by James R. Doty, MD

Extraordinary things happen when we harness the power of both the brain and the heart

Growing up in the high desert of California, Jim Doty was poor, with an alcoholic father and a mother chronically depressed and paralyzed by a stroke. Today he is the director of the Center for Compassion and Altruism Research and Education (CCARE) at Stanford University, of which the Dalai Lama is a founding benefactor. But back then his life was at a dead end until at twelve he wandered into a magic shop looking for a plastic thumb. Instead he met Ruth, a woman who taught him a series of exercises to ease his own suffering and manifest his greatest desires. Her final mandate was that he keep his heart open and teach these techniques to others. She gave him his first glimpse of the unique relationship between the brain and the heart.

Part memoir, part science, part inspiration, and part practical instruction, Into the Magic Shop shows us how we can fundamentally change our lives by first changing our brains and our hearts. - Amazon
Recommended Current Bestsellers

**Mountains Beyond Mountains**, by Tracy Kidder

Tracy Kidder is a winner of the Pulitzer Prize and the author of the bestsellers *The Soul of a New Machine, House, Among Schoolchildren*, and *Home Town*. He has been described by the *Baltimore Sun* as the “master of the non-fiction narrative.” This powerful and inspiring new book shows how one person can make a difference, as Kidder tells the true story of a gifted man who is in love with the world and has set out to do all he can to cure it. In medical school, Paul Farmer found his life’s calling: to cure infectious diseases and to bring the lifesaving tools of modern medicine to those who need them most. Kidder’s magnificent account takes us from Harvard to Haiti, Peru, Cuba, and Russia as Farmer changes minds and practices through his dedication to the philosophy that “the only real nation is humanity.” - Amazon

**When Breath Becomes Air**, by Paul Kalanithi

*#1 NEW YORK TIMES BESTSELLER* At the age of thirty-six, on the verge of completing a decade’s worth of training as a neurosurgeon, Paul Kalanithi was diagnosed with stage IV lung cancer. One day he was a doctor treating the dying, and the next he was a patient struggling to live. And just like that, the future he and his wife had imagined evaporated. *When Breath Becomes Air* chronicles Kalanithi’s transformation from a naïve medical student “possessed,” as he wrote, “by the question of what, given that all organisms die, makes a virtuous and meaningful life” into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. - Amazon
Lab Girl, by Hope Jahren

AMAZON National Best Seller; Named one of TIME magazine’s "100 Most Influential People"
A TIME and Entertainment Weekly Best Book of 2016 Lab Girl is a book about work, love, and the mountains that can be moved when those two things come together. It is told through Jahren’s remarkable stories: about her childhood in rural Minnesota with an uncompromising mother and a father who encouraged hours of play in his classroom’s labs; about how she found a sanctuary in science, and learned to perform lab work done “with both the heart and the hands”; and about the inevitable disappointments, but also the triumphs and exhilarating discoveries, of scientific work.

A Thousand Naked Strangers, by Kevin Hazzard

A former paramedic’s visceral, poignant, and mordantly funny account of a decade spent on Atlanta’s mean streets saving lives and connecting with the drama and occasional beauty that lies inside catastrophe. In the aftermath of 9/11 Kevin Hazzard felt that something was missing from his life—his days were too safe, too routine. A failed salesman turned local reporter, he wanted to test himself, see how he might respond to pressure and danger. He signed up for emergency medical training and became, at age twenty-six, a newly minted EMT running calls in the worst sections of Atlanta. His life entered a different realm—one of blood, violence, and amazing grace.

Five Days at Memorial, by Sheri Fink
One of the New York Times’s Best Ten Books of the Year
Winner of the National Book Critics Circle Award for Nonfiction; Winner of the 2014 J. Anthony Lukas Book Prize, the PEN/John Kenneth Galbraith Award, the Los Angeles Times Book Prize, the Ridenhour Book Prize, the 2014 American Medical Writers Association Medical Book Award (Public/Healthcare Consumers), a 2014 Science in Society Journalism Award, and the SIBA 2014 Book Award for Nonfiction Pulitzer Prize winner Sheri Fink’s landmark investigation of patient deaths at a New Orleans hospital ravaged by Hurricane Katrina – and her suspenseful portrayal of the quest for truth and justice. – Amazon

The Power of Habit, by Charles Duhigg
OVER 60 WEEKS ON THE NEW YORK TIMES BESTSELLER LIST
NPR BESTSELLER; WASHINGTON POST BESTSELLER; LOS ANGELES TIMES BESTSELLER; USA TODAY BESTSELLER; PUBLISHERS WEEKLY BESTSELLER;
NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Wall Street Journal • Financial Times
In The Power of Habit, Pulitzer Prize–winning business reporter Charles Duhigg takes us to the thrilling edge of scientific discoveries that explain why habits exist and how they can be changed. - Amazon
The Art of Hearing Heartbeats, by Jan-Philipp Sendker

The Art of Hearing Heartbeats, by Jan-Philipp Sendker, is an inspirational book that tells of a father’s life journey, and the daughter who returns to his country of origin, Burma, in search of him. Determined to solve the mystery of his sudden disappearance, she learns about the hardships of his youth where he overcame neglect and disability, and his unfaltering determination to return to the one that he loves. This book is very well written and is an elegant combination of mystery, the journey of life, and the determination to overcome obstacles. - Kate Bright, Admin

The Demon in the Freezer, by Richard Preston

For those that enjoy thriller novels, The Demon in the Freezer by Richard Preston is a quick, informative read based off of real facts. Written not long after the anthrax attacks in 2001, the book speculates that not all the stores of smallpox are accounted for, something that in recent times has been proven correct. Will vaccine resistant smallpox be the next form of biological warfare? - Mariah Schneider, Document Delivery/ Interlibrary Loan
